WELCOME TO ENDURAMAXX

The UK'S leading manufacturer of rotationally moulded tanks and liquid storage containers.

From WRAS approved polymer drinking water and beverage storage tanks to bunded chemical storage solutions, we work within many industries across the UK offering a fast, easy, and supportive experience to a diverse customer base.

UNIQUE, ROBUST, TRIED AND PROVEN PRODUCTS

ISO 9001 accreditations ensure we can stand behind our unsurpassed quality and product guarantees offering clients total peace of mind when specifying, sourcing, and installing Enduramaxx products.

VERTICAL WATER STORAGE TANKS

POTABLE & NON-POTABLE

The UK's No.1 water storage tanks for drinking water and rainwater harvesting systems

40 SIZES
FIT ANYWHERE
150 TO 90,000 LITRES

Low profile tanks are perfect for water storage in stables and other low roof buildings

TANK RANGE 1.0 SG

COLOUR OPTIONS		BLACK / NATURAL / BOAT BLUE / DARK GREEN

POPULAR USES

- Potable tanks made from WRAS Approved polymer
- Use for bulk water storage and back-up emergency drinking water supply, or temporary water supply for events and festivals
- Ideal for catching rainwater from your roof using our simple rain harvesting systems
- Landscape watering for sports fields and other green areas

ALL TANKS ARE:

- Single rotational mould for strength
- Impact and corrosion resistant
- Heavy-duty and 100% rust proof
- Mid density polyethylene
- CAT5 compliant options available
- Hygienic surfaces inside and out
- UK manufacture and ISO Quality Control

WATER TANK COMBINATIONS

The quick, easy and cost effective solution for water storage with limitless volumes achieved by linking tanks through our simple connection kits.

Filter Kits have a calmed inlet to prevent incoming water disturbing any sediment

RAINWATER HARVESTING ACCESSORIES

- First flush filter
- Calmed inlet to prevent incoming water disturbing any sediment
- Suitable for 110mm (4") downpipes
- Siphon overflow included

THREE FILTER KITS to match your choice of tank size;

FILTER KIT A
200m² for tanks
1,250 to 10,000L
CODE: 254010

FILTER KIT B
450m² for tanks
5,000 to 20,000L
CODE: 254020

FILTER KIT C
800m² for tanks
5,000 to 30,000L
Suitable for 4" or 6"
downpipes
CODE: 254030

CALMED INLET

SIPHON OVERFLOW

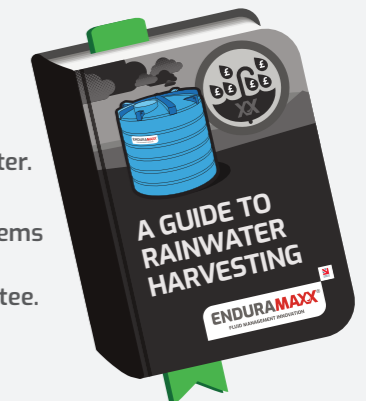

All kits also include a calmed inlet and siphon overflow

7 SIMPLE STEPS

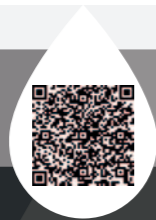

START SAVING WATER AND MONEY WITH RAINWATER HARVESTING;

- 1 HOW MUCH RAINWATER DO YOU REQUIRE?**
Decide on the amount of rainwater you will need to have stored in reserve and also the amount of water you will be able to harvest from your roof
- 2 CALCULATE YOUR ANNUAL USAGE**
Calculate your likely annual usage.
This can be done with the aid of your current water bill
- 3 WHAT SIZE TANK WILL YOU REQUIRE?**
By using the water catchment formula online you can calculate the tank capacity you will require
- 4 WHERE DO YOU WANT TO PUT YOUR TANK?**
Identify your preferred tank location and measure the space and height available
- 5 CHOOSE FROM AVAILABLE OPTIONS**
Choose your Vertical or Horizontal Rainwater Harvesting Tank from the list or on our website
- 6 CHOOSE FROM THREE FILTER KITS**
The kits contain: Siphon Overflow, Calmed Inlet and an Internal Pipe
- 7 PLACE YOUR ORDER AND ARRANGE DELIVERY 01778 562810**

Balanced pH in rainwater is better for crops - and free from chlorine that can be found in mains water. Our simple, reliable and affordable rainwater systems are all backed by the Enduramaxx solid Guarantee.

HORIZONTAL TRANSPORT TANKS

Horizontal transport tanks used for transporting liquid such as water and fertiliser. These tanks are designed to mount on to flat surfaces using the unique pin mounting system without the need for steel mounting straps

IDEAL FOR:

- Bulk water storage
- Brewing and winemaking sectors
- Temporary, or back-up water supply for events and festivals
- Food industry
- Domestic water solutions
- Civil engineering where mains water is unavailable

CAT 5 COMPLIANCE

How to comply with Category 5 Backflow Prevention Water Regulations

WHAT ARE THE WATER SUPPLY (WATER FITTINGS) REGULATIONS AND SCOTTISH WATER BYELAWS?

They play an important role in protecting public health, safeguarding water supplies and promoting the efficient use of water within customers' premises across the UK.

They set legal requirements for the:

- Design
 - Installation
 - Operation and Maintenance
- of all plumbing systems, water fittings and water-using appliances. They are to prevent misuse, waste, undue consumption or erroneous measurement of water and, most importantly, to prevent contamination of drinking water.

WHAT HAPPENS IF WE'RE FOUND NOT TO COMPLY?

Regulations apply to all users of water and it is a criminal offence to contravene the regulations or byelaws and offenders may face prosecution.

Those found guilty will have a criminal record, be fined and may have to pay costs. The water provider will require that the breaches are to be rectified as soon as practicable. Where breaches pose a risk to health or there is a significant waste of water, the water supply to the premises may be disconnected immediately to protect public health and prevent waste or damage to premises.

4 SIMPLE STEPS TO WATER REGULATIONS COMPLIANCE

DO CATEGORY 5 REQUIREMENTS APPLY TO ME AND HOW CAN I MAKE SURE I COMPLY WITH WATER REGULATIONS:

1 SEEK PROFESSIONAL GUIDANCE:

Your water board will have a technical team who provide guidance to ensure your water systems comply with regulations.

2 GET APPROVAL FOR YOUR PROPOSED WORK:

Again, your water board can advise - It is well worth investing time to ensure approval from any regulatory body such as building regulations or a water board inspection.

3 SPECIFY AND USE APPROVED PRODUCTS:

Using WRAS approved products is essential, be sure to ask manufacturers for certification that backs their claims of compliant products.

4 USE QUALIFIED CONTRACTORS:

If you are not approved yourself, it is strongly advisable to use approved contractors. Your water board will be able to advise you of who to use.

Be sure to ask contractors for certification too.

CONE TANKS & TANKS WITH FRAMES

CLOSED TOP TANKS

Our cone bottom tanks, available with closed or open tops, offer choices of a 5, 15, 30, 45 and 60-degree cone base, providing the ultimate solution for applications that require a complete drain.

FEATURES AND USES OF CLOSED TOP TANKS:

- Ideal for cider & beer brewing, wine making and other food or drink storage
- Industrial holding tank
- Chemical storage
- Process water and water treatment
- Customisation available, including fitting of flanges, pipework and other accessories
- AVAILABLE WITHOUT FRAMES

INDUSTRIAL WATER & CHEMICAL STORAGE TANKS

Industrial water and chemical tanks serve a variety of purposes. They need to be strong and non-reactive with the chemicals they contain. Enduramaxx plastic rotationally moulded tanks are made from polyethene (PE) according to which what's being stored.

TANKS FEATURES:

- Available for 1.5 or 2 SG product
- Customised fittings and flanges including BSP inlets and outlets, PN16 flanges, welded sockets.
- Liquid level assemblies, fill pipes and suction pipes are available terminating in BSP and flanged connections.

CHEMICAL DOSING TANKS

Specifically designed for use within water treatment, purification, chemical dosing and storage applications, these cylindrical chemical storage tanks include a flat raised section shelf section to mount equipment on top of the tank.

VERTICAL MOLASSES AND FERTILISER TANKS

BULK STORAGE

Heavy duty, thick wall for the bulk storage of liquid fertiliser and molasses with a specific gravity up to 1.5.

Save money, reduce fertiliser mixing time, minimise waste and fill fast

TANK FEATURES:

- Supplied with bolt down feet for secure installation
- Mushroom vent fitted as standard for adequate venting and fast filling/emptying
- Supplied with siphon tube to reduce settlement of liquids
- Different outlet options available in PN16 flange and BSP thread in a range of sizes

OPEN TOP TANKS

Open top water tanks are available in a range of sizes from 150 to 25,000 Litres with a choice of 1.0 SG or 1.5 SG density

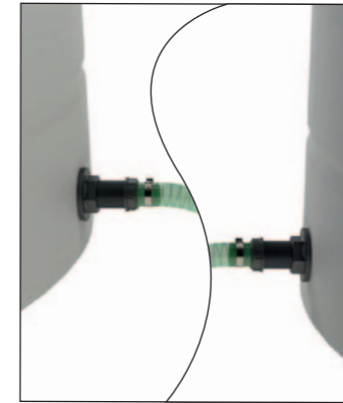

TANK FEATURES

- Lid removed for total access
- Ideal for blending, mixing and dipping, or as secondary containment of liquids
- Low Profile tanks can be used in aquaculture for fish holding and quarantine tanks, or as Koi tanks and fishponds
- Customisation available, including fitting of flanges, pipework and other accessories
